

BRINGING

New Life to New Families

Christ-centered pregnancy care centers capture the essence of the ministry of the Gospel like few other organizations do. Just as being 'born again' through Jesus Christ brings eternal life, physical births are occurring because pregnancy care centers are helping parents choose life.

The opportunities for successful outcomes through the Birth of a Family™ program in pregnancy care centers are enormous.

Pregnancy care ministry is profoundly effective in reducing the number of pregnancies ending in abortion. However, the challenges of fatherlessness, unwed and single parenthood and the devastation of abortion on all involved are clearer now than ever. Because of the effectiveness of pregnancy care centers, you are in a unique position to use the Birth of a Family program to bring about significant change at another level.

Birth of a Family is a gift. This program is designed to be given to pregnancy care centers. Its implementation adds value, benefit and reach to the wonderful work you are already doing by:

- Reducing abortion recidivism
- Turning the rising tide of the fatherless
- Bringing new laborers into the harvest
- Expanding your development capacity
- Promoting the founding and strong growth of lasting nuclear households

Birth of a Family cannot address this incomparable opportunity without your involvement. Please consider the implementation of this program at your pregnancy care center and join us in capturing these unique opportunities, converting them into lasting nuclear families where fathers, mothers and their children all live and grow in one home.
